

HANDLE FOR SICKLE

VI4033

The Sickle Handle is designed to provide comfort and control when using cutting tools. Measuring 200 mm in length and 27 mm in diameter, this wooden handle is lightweight and durable, weighing just 100 g. Its structure offers excellent balance, which is essential for cutting tasks in agricultural and gardening areas. This handle is ideal for replacing or upgrading the handle of existing sickles, ensuring a firm and secure grip. Its lightness and compatible dimensions make it easy to handle, making it suitable for pruning and harvesting tasks.
