

HANDLE FOR HATCHET 1M VI4035

The 1m axe handle is made from high-strength wood, offering an excellent replacement option for large axes. With a diameter of 59 mm and weighing 1.04 kg, it ensures firmness and stability during use, making it suitable for heavy cutting work in forest or agricultural environments. Its robust and ergonomic design facilitates prolonged handling, providing greater control and safety in demanding tasks, such as felling trees or cutting firewood.
