

METAL HOSE 0,50M

VIB100

The 50 cm metal hose with 1/4" (6 mm) connections is a versatile and durable solution for various hydraulic applications. Flexible and easy to install, it fits perfectly into sink and faucet installations, securely connecting the water supply and allowing adjustments in tight spaces. It is also ideal for toilets, ensuring a reliable connection between the water outlet valve and the fixture. Additionally, this metal hose is widely used in gas water heaters, capable of withstanding high temperatures and offering extra safety in gas-related installations, preventing leaks. In some cases, it is also the preferred choice for connecting water inlets to washing machines and dishwashers, thanks to its durability and resistance, ensuring a long lifespan in various applications.
