

FLOAT SWITCH WITH COUNTERWEIGHT

VIBB15

The float switch with counterweight and 1.5-meter cable allows for automatic control of water pumps, protecting the equipment by shutting off the pump when there is no water, preventing dry running. In addition to preventing overflows, it automates the water level control system, contributing to energy savings. With dual functionality, it turns the pump on when the tank is empty and off when it's full. This float switch is essential for providing safety and efficiency in hydraulic installations.

Specifications

IP rating	IP68
Maximum liquid temperature	60° C
Supply voltage	230V AC 50Hz

Variants

Reference	Ip Rating	Maximum Liquid Temperature	Supply Voltage
VIBB15	ip68	60° c	230v ac 50hz
VIBB3	ip68	60° c	230v ac 50hz
VIBB5	ip68	60° c	230v ac 50hz
