

DIGITAL HOT AIR GUN - 20V VIBCPAQD20

VITO's 20V Digital Hot Air Gun is ideal for efficiently removing, shaping or heating materials. This gun has two air flow speeds, as well as two adjustable temperatures: 30 °C to 400 °C and 30 °C to 550 °C, making it versatile. In addition, it is equipped with a digital display for temperature regulation, ensuring greater control of the air. Compact and powerful, this tool allows you to carry out tasks with practicality and efficiency. Thanks to the common EGO battery range, the same battery can be used in several of the brand's machines, increasing autonomy.

Key features

- > Two adjustable airflow speeds depending on the type of task;
- > Versatility ensured by the possibility of switching between two temperature ranges;
- > Digital display, allowing you to control the temperature;
- > Powered by a standard battery from the EGO range (2Ah to 6Ah);
- > Lightweight, portable and robust design, optimizing the performance of tasks.

Specifications

Air flow - 1st speed	250-500 L/min
Air flow - 2nd speed	250-500 L/min
Motor type	Carbon brushes
Operating temperature - 1st speed	30° C - 400° C
Operating temperature - 2nd speed	30° C - 550° C
Sound power level (LWA)	
Speeds	2
Voltage	20V
