

PADDED JACKET ALPHA

VICAAL

Alpha V-Spirit padded jacket designed for demanding outdoor work and activities, providing effective protection against cold, wind and rain. Manufactured with high-quality technical materials, it offers water resistance up to 8000 mm on the exterior and breathability up to 800 MVP, ensuring thermal comfort and moisture control. The DWR (Durable Water Repellent) technology allows water to bead off the fabric surface, keeping the body dry even in adverse weather conditions. Features include underarm ventilation zones, durable fastenings, functional pockets and reflective elements for enhanced visibility. A reliable and durable jacket for professional use.

Key features

- > Jacket with a comfortable and functional design;
- > The use of different fabrics combines flexibility, durability and protection against weather conditions (cold / wind / rain);
- > Breathable and suitable for outdoor activities;
- > Water repellent (DWR);
- > Zip fastening with chin guard;
- > Adjustable elasticated cuffs with hook and loop fasteners;
- > 2 side pockets with lining on the inside and zip fasteners;
- > 1 chest pocket with zip fastening;
- > Ventilation holes in the underarm area;
- > 1 inner zip pocket for wallet;
- > 1 inner pocket with button for mobile phone or notebook;
- > Reflective stripes on the front and back flap;
- > Adjustable springs on the sides of the jacket.

Specifications

Available sizes	S, M, L, XL, XXL
Composition	75D fabric, 100% polyester (outer), 65% polyester, 35% cotton (inner)
Grammage	160 g/m² (outer), 245 g/m² (inner)
Lining	210T taffeta
Water-resistant	5K1 / 5K1 - DWR

Package Contents

Outer fabric 75D fabric, 100% polyester with mechanical stretch TPU laminated, knit +50D Weight: 160 g/m² Water resistance: 8000 mm Breathability: 800 MVP Water repellency: 5K / 5K DWR* finish Inner fabric 65% polyester, 35% cotton TPU laminated Weight: 245 g/m² Waterproof rating: 5K (5000 mm) Breathability: 5K (5000 g/m² / 24 h) DWR* finish Lining 210T taffeta Padding 100% polyester Technical information DWR*: Durable Water Repellent treatment that allows water to bead and run off the fabric, providing extra moisture protection. 5K / 5K: Moderate waterproofness (5000 mm) and breathability (5000 g/m²/24 h), ideal for outdoor use in variable weather conditions.
