

TILE LEVELLING KIT

VICNC1

This kit is equipped with a pair of levelling pliers that ensure the uniform application of wedges, guaranteeing the levelling of surfaces. In turn, levelling bases allow you to mark the distance between each piece, while levelling wedges eliminate any unevenness that may be present. In addition, the plastic bucket facilitates transport and storage of the entire kit.

Key features

- > **Sturdy plastic bucket:** Makes transport easier and keeps all accessories organised.
- > **Levelling pliers:** Allows you to adjust the pressure of the wedges for uniform levelling.
- > **Levelling bases:** They ensure the exact distance between the workpieces.
- > **Levelling wedges:** They eliminate unevenness and ensure a professional finish.
