

STRIP DISC M14

VIDD115M14

This disc, ideal for cleaning and preparing surfaces, can be used on a variety of ferrous materials. It also removes rust oxidation on flat or intricate areas of various dimensions, such as garden furniture and gates. In addition, the durability and resistance of the accessory ensure its efficiency when carrying out restoration and maintenance tasks. This means that surface residues can be removed without damaging the material being worked on.

Key features

- > Provides effective waste removal;
- > Efficiency in surface restoration and maintenance.

Specifications

Blade hole diameter	22,2
Rotation speed	13300
Spindle thread	M14
Standards	EN 13743
Suitable for	Removal of paints and varnishes on wood, metal, steel and stone
Vmax m/s	80
