

STAINLESS STEEL MEMBRANE PRESSURE TANK 24L

VIDI24

Horizontal Tank with capacity for 24L and Thread 1" 26mm, Maximum pressure of 8bar (115psi) and maximum temperature of 60°C.

Key features

- > Prevents frequent pump activation: The tank stores pressurized water, reducing the need to constantly turn the pump on and off, extending its lifespan.
- > Stainless steel body: Ideal for environments that require corrosion resistance, ensuring that stored water maintains its quality.
- > 24-liter capacity: Provides a practical solution for storing pressurized water in pressurization systems.
- > Maximum temperature of 60°C: Withstands high temperatures, maintaining performance in demanding conditions.
- > Maximum pressure of 8 bar (115 PSI): Suitable for applications that require high pressure, ensuring reliable performance.

Specifications

Body	Stainless steel
Capacity	24L
Finish	Stainless steel
Hose connector thread	1" 26 mm
Maximum pressure	8 bar (115 PSI)
Maximum temperature	60°C
