

## MXR SPEED MEASURING TAPE

### VIFMXR3S

Nylon-coated steel measuring tape, with a rubber-coated ABS plastic case, a metal hook ideal for vertical measuring and a locking button that retracts the tape immediately. It is also graduated in millimetres on both sides.

#### Key features

- > Nylon-coated steel tape;
- > Rubber-coated case;
- > Automatic recoil locking mechanism;
- > Button for automatic retraction;
- > Double hook with triple rivet (for measurements using a stable-standing surface and traction);
- > Up to 2.4m long without folding;
- > European Precision Standard - Class II.

#### Specifications

|                                         |                              |
|-----------------------------------------|------------------------------|
| Case                                    | Rubber-coated plastic ABS    |
| Hook                                    | Ideal for vertical measuring |
| Locking button and auto-retracting tape | Yes                          |
| Tape                                    | Nylon-coated steel           |

#### Variants

| Reference | Case                      | Hook                         | Locking Button And Auto-Retracting Tape | Tape               |
|-----------|---------------------------|------------------------------|-----------------------------------------|--------------------|
| VIFMXR3S  | rubber-coated plastic abs | ideal for vertical measuring | yes                                     | nylon-coated steel |
| VIFMXR5S  | rubber-coated plastic abs | ideal for vertical measuring | yes                                     | nylon-coated steel |
| VIFMXR5SL | rubber-coated plastic abs | ideal for vertical measuring | yes                                     | nylon-coated steel |
| VIFMXR8S  | rubber-coated plastic abs | ideal for vertical measuring | yes                                     | nylon-coated steel |
