

CHAINSAW FILE - 4 UN VILM414

The set of 4 files for chainsaws is specially designed for the maintenance and sharpening of chains for chainsaws. With a dimension of 1/4" (6.35 mm), these files are perfect for ensuring more precise cuts and extending the life of the blades. Made from carbon steel, they are durable and resistant, offering efficient sharpening even after prolonged use. The rubber-coated handle provides greater comfort during use, allowing for extended operation without causing discomfort. This set is essential for those looking to maintain the performance of their chainsaw in optimal condition, whether for domestic use or professional work in forestry and gardening.

Key features

- > Rubber coated handle for greater comfort.
- > Carbon steel body.
