

6 BAR PRESSURE GAUGE FOR WATER PUMP

VIMBM

This 1/4" (6.35 mm) pressure gauge is designed to monitor pressure in electric pump systems. With a capacity to measure up to 6 bar, it is ideal for use in hydraulic systems that require constant pressure control to ensure operational efficiency and safety. Durable and easy to install, the gauge offers reliability in a wide range of applications, from residential to commercial pumping systems, providing accurate readings and helping extend equipment life by preventing overpressure.

Specifications

Diameter	1/4" 6mm
Maximum pressure	6 bar
