

COMPLETE TINE (PAIR) FOR VITO TILLERS

VIME7.C.6.000

The set of 2 tines is compatible with VITO models VIME7, VIMETD7, and VIME7A. With a working width ranging from 700 mm to 850 mm, these cutters are designed to enhance efficiency in soil preparation across various types of terrain. Constructed from robust materials, they ensure durability and superior performance in compacted soils, facilitating aeration and mixing of the earth. Recommended for planting a variety of crops, from vegetables to cereals, these cutters provide more uniform and efficient soil preparation. With their sturdy construction, this set is ideal for those seeking a high-performance solution to optimize yield in the field and ensure successful cultivation on agricultural land under diverse conditions.

Key features

- > Set of 2 tines.
- > Compatible with VITO models VIME7, VIMETD7, and VIME7A motor tillers.
- > Facilitates aeration and mixing of the soil.
