

DIGITAL HOT AIR GUN 2000W

VIPAQD2000

Easy and safe to use, this hot air gun has digital temperature and air speed adjustment. It also features an excellent quick heating capacity, due to its internal ceramic composition, ensuring durability and effectiveness in all tasks. In addition, it includes a BMC storage case and a set of stainless steel accessories, ensuring greater resistance and durability, thus offering a greater number of applications for users.

Key features

- > Digital temperature control;
- > Ceramic heating element;
- > Removable hot air outlet plastic guard;
- > Suitable for removing, shaping or heating materials;
- > Nozzle and gun cooling function (1st speed);
- > Removal function of paints, varnishes, material residues, stickers, welding / bending plastic pipes, shaping, fixing and fusing pipe joints, drying paints and varnishes, waxing and de-waxing as well as unscrewing rusty screws (2nd speed)

Specifications

Air flow - 1st speed	250-500 L/min
Air flow - 2nd speed	250-500 L/min
Height	285 mm
Length	350 mm
Operating temperature - 1st speed	50° C (Cooling-off)
Operating temperature - 2nd speed	50° C - 650° C
Power cord length	2 m
Product weight	0.928 kg
Rated power	2000 W
Speeds	2
Supply voltage	230 V AC ~ 50 Hz
Weight with packaging	2.251 kg
Width	115 mm
