

## PROFESSIONAL SPRAYER 5L VIPUPRO5

VITO`s 5-Litre Pro Sprayer is a professional solution for spraying disinfectants and neutral products and is ideal for use in a wide range of sectors, from construction sites to industrial contexts. This product, suitable for intensive and demanding professional applications, has a reinforced plastic construction with a level indicator and UV protection, which makes it durable and resistant to wear and tear caused by exposure to the sun. With integrated Viton O-rings, the sprayer offers a reliable, long-lasting seal as well as chemical and thermal resistance against most solvents and disinfectants. It also includes a pressure regulator to precisely control the flow of product spray. It is also equipped with a position brake and a safety valve to ensure a comfortable and safe work.

## **Key features**

- > High resistance to solvents and disinfectants;
- > 5-litre capacity, optimising tasks;
- > Level indicator, allowing you to manage liquid consumption;
- > Viton O-rings that ensure a reliable seal;
- > Safety guaranteed by the position brake and integrated valve;
- > Adjustable shoulder strap ensuring comfort and ergonomics.
