

## HACKSAW 300MM

### VISCF300

VITO`s Hacksaw is an efficient solution for making quick and precise cuts in metal. This hacksaw features a bi-metal blade that ensures durability and resistance, prolonging sharpness even in demanding jobs. The steel structure provides robustness, while the ABS handle provides comfort and firmness during cutting, reducing fatigue. With 24 teeth per inch, each cut is efficient, fast, and uniform, making it easy to work on professional or DIY projects. In addition, the hacksaw features a blade clamping mechanism, ensuring safety and stability.

#### Key features

- > Ergonomic handle that ensures comfort, even during continuous work.
- > Resistant bi-metal blade, ideal for cutting iron without rapid wear.
- > Steel structure provides strength and durability.
- > Uniform cuts, thanks to 24 teeth per inch.
- > Suitable for several types of projects, from DIY to professional.
