

STRAIGHT CUT TIN SNIPS PRO 10" VITCCPRE

VITO's PRO 10" Straight Cut Tin Snips are a professional solution for cutting sheet metal, offering efficiency, durability, and precision. Equipped with chrome-molybdenum steel blades, these tin snips guarantee reinforced cuts in aluminium, stainless steel and iron, and greater resistance to wear, extending the product's useful life. They have an ergonomic bimaterial handle that provides greater comfort and control during use, optimising the user's work. In addition, the colour system makes it easy to identify the direction of the cut, and the safety interlock is an additional element of protection.

Key features

- > Chrome-molybdenum steel blades for greater strength and durability;
- > Long-lasting comfort ensured by the ergonomic handle;
- > Reinforced cut to guarantee efficiency, even in demanding jobs;
- > Quick identification of the cutting direction thanks to the colour system;
- > Safety lock for added protection.

Specifications

Blade	Chrome vanadium steel
