

200MM SUCTION CUP WITH BATTERY-POWERED PUMP

VIV200B

With a diameter of 200mm, it provides a wide contact area, increasing its efficiency in holding and transporting large and heavy objects. This model can support up to 120kg, making it ideal for operations requiring the safe and stable handling of heavy materials. Robustness is guaranteed by the quality of the materials used, as well as the presence of a vacuum pump that ensures a constant vacuum is maintained during use, preventing accidental falls. Powered by a 3.7V battery with a capacity of 2000Ah, it provides extended autonomy. The high-capacity battery ensures that the suction cup can be used for long periods without the need for frequent recharging, thus optimising productivity. If the automatic pump's battery fails, it also comes with a manual pump, easy to replace. The pressure gauge, an essential accessory for real-time vacuum monitoring, allows the user to control the vacuum with precision.

Key features

- > Manual or automatic operation of the pump (battery-operated);
- > Works on any finish, smooth, rough or textured;
- > Real-time vacuum monitoring;
- > Useful for handling heavy materials or large format tiles;
- > Pressure gauge;
- > Suction cup's protective cover;
- > Non-slip coated handle.

Specifications

Battery	3.7V - 2000mAh
Dimensions	115 x 250 x 280mm
Maximum weight supported by the suction cup	120 Kg
Suction cup diameter	200 mm
Weight	1,92 Kg
